

Research & Development Request

HORIZON 2020-SC1 Partner Search: Microcurrent Stimulation for Wound Healing

Summary

A Greek university research team is planning to submit a proposal to the forthcoming H2020-PHC-2014-two-stage call on Innovative therapies for wound healing, with emphasis on current & microcurrent stimulation. The consortium includes partners from Greece, Germany, The Netherlands, Switzerland & Denmark. The consortium is urgently looking for 2-3 additional partners from university, research organisation, SME or industry with expertise in wound-healing at clinical, cellular or molecular level.

Details

Description

A laboratory from a Greek University with expertise in EU Research & Innovation programmes is planning to apply for the forthcoming H2020-PHC-2014-two-stage call under the topic: PHC13 – 2014 "New therapies for chronic non-communicable diseases" with deadline 11 March 2014. The proposal will focus on Innovative therapies for wound healing, with emphasis on current and microcurrent stimulation. The application will build on pre-existing pre-clinical research and a concise feasibility assessment will also be provided. Partners are already involved from Greece, Germany, The Netherlands, Switzerland and Denmark. The consortium is looking for 2-3 additional partners from university, research organisation, industry or SME with experience in the "Wound healing" theme at clinical, cellular or molecular level.
